

B detector testing

Presented by: Torbjörn Tjärnhage, FOI

?!

So many variables!

- Standard test condition
 - Reference material
 - Method for exposure
 - Method for reference measurements
 - Customer requests

Standard tests/ measure parameters

- LoD
- False positive/negative rate
- Sensitivity
- Selectivity
- Response time
- Operational testing

Example BG

- Try to describe what are the pro/con if we choose BG as reference material.
