

- Chemical threat is complex and changing
- First develop test and methodology based on military standard
- Starting point could be CWA and add TIC in second step
- Need for comparable testing :
  - Procedures – Protocols - Facilities
- Advantages of inter comparison testing
- Reduce costs : international testing cooperation on regular basis (round Robin)
- Need to agreed on agent and interferent for testing
- Have lab testing and outdoor testing

- Follow on workshop to agree on workload within CREATIF project
- Creation of an information sharing network for partners
- Provide an roadmap with a set of smart measurable building blocks
